

## Julien Rousseau

After a retraining at Paris' Wild Code School, I'm looking for new and exciting web development challenges ! I'm **ready to work starting now in Montreal** with an activated WHP, an open working permit which allows me to work in the exact same conditions as a Canadian employee, without any paperwork to do on your side !

## TECH & PEOPLE SKILLS

### Development :

#### FRONT-END

HTML, CSS, JavaScript, React

#### BACK-END

NodeJs, SQL, MySQL, PHP and Python

Basics

### Tools :

Git, Scrum, Workbench

CMS : Wordpress

Graphic design: Photoshop, Illustrator

Other softwares : Office Suite

Languages: English (technical and professional)

### Soft skills :

Confortable working in team and in autonomy

Verbal and writing communication

Always ready to improve my skills and learn more

## WEB DEVELOPMENT EXPERIENCE – references on demand

### LES DEMOISELLES DE PLUME – 4 months internship, from Aug. to Nov. '20

**Context :** Full-autonomy internship – after the opening of a second high quality woman clothes store, the owners of this company asked me to create 2 websites : a corporate one, then an e-shop platform.

#### Tasks and achievements :

- Weekly meeting about the work in progress
- Theme creation for the corporate website
- Use of plugins dedicated to SEO, contact tools, an Instagram feed...
- File management with FileZilla

- E-Shop platform creation
- Cookies management on both websites
- Massive integration of content
- Features complete tests
- Training for the future users/admins

#### Tech environment :

Wordpress and its plugins, Woocommerce, HTML, CSS, PHP, JavaScript, FileZilla

## PROJECTS REALIZED DURING THE TRAINING

### NOTE

You can find all my projects in details via <https://passiongeex.netlify.app/>

**Context :** All these projects were conceived at Wild Code School, within random teams. For each of them, we had to follow the Scrum Method and each team mate had to be either Scrum Master, Product Owner or Reviewer at least once in the project. Each project led to a public demonstration.

### **PICTYQUIZ – 8 weeks, from June to July 2020**

Project brought by a real life client, who wanted to recreate a game he used to play 10 years ago, which purpose was to guess names, titles related to theme pictures before time's up. Furthermore, our client's desire was to build a community.

#### **Tasks and achievements :**

- Wireframes creation and presentation to the client
- Preparation of a database
- Subscription/Authentication system
- Creation of a forum dedicated to subscribers
- Admin platform to manage the content and the different app features

#### **Tech environment :**

React, NodeJs, SQL, Workbench, CSS

### **POKEFIGHT – 5 weeks, between April and May 2020**

React and RESTful API learning to create a simulation of the Pokemon fight system

#### **Tasks and achievements :**

- Wireframes conception
- Creation of a dynamic menu
- Fight system
- Management of the global responsive aspect

#### **Tech environment :**

React, CSS, RESTful API

### **+1 project – Flexbox learning, responsive design and GIT (second training week)**

## HACKATHONS

### **VIRTUAL WAITING ROOM – 48 hours, from June 24th to 26th 2020**

Hackathon sponsored by Doctolib and Dataiku. The theme was about remote Healthcare. More than 100 European teams were participating, and this project won the first place during the finale in July (you can find the link to the English demonstration on my portfolio !)

#### **Tasks and achievements :**

- General design of our MVP
- Creation of a demo dashboard
- Speech writing and App demonstration (in French during the qualification session, then in English for the Finale)

#### **Tech environment :**

React, CSS

### **+1 hackathon – 24 hours, creation of a 'Whack-A-Mole' game replica**
